

Hero Biobased Resin Cleaner

Hero Biobased Resin Cleaner removes all types of mastics, adhesives, pastes, and glues. It is environmentally-friendly, plant-based, low-odor and low VOC. It brings superior performance and safety to your workplace. Composed of a researched blend of surfactants which makes this product rinsible with water with no residue left behind.

Mastic removal is a challenging task because these types of adhesives are designed to be waterproof and sealing. Hero Biobased Resin Cleaner rises to the challenge and makes removing these materials effortless. Safely works on concrete, asphalt, or tile. Use Hero Biobased *Heavy-Duty* Resin Cleaner when the need is for especially tough *hardened* mastics, adhesives and pastes. The *Before* and *After* pictures shown demonstrate Hero Biobased Resin Cleaner's strength.

Features and Benefits

- Biobased, plant-based formula contains no harsh chemicals.
- Non-combustible, low VOC, no ODCs, neutral pH, non-HAPs, biodegradable, and recyclable resulting in reduced disposal costs.
- Works on the toughest mastics on all types of surfaces.
- Derived from vegetable oil blend which has significant regulatory and safety advantages over petroleum-based solvents and addresses the health concerns facing solvent users today.
- Removes inks (oil based, solvent based, uv-curable, varnish), adhesives (hot melt, polyurethane, vinyl ester), resin & coatings (polyester, vinyl ester, polyurethane, high & low solid aliphatic, waterborne epoxy primers, acrylic paints, varnish and alkyd enamel, latex polymer and other paints), as well as pMDI resin (polymeric methylene diphenyl diisocyanate).
- Contains No Hydrocarbon Aromatic Naphtha, Phenols, Butyl Cellosolve, Acetone, MEK, Xylene, Toluene or Methylene Chloride.
- Can remove newer mastics, layered adhesives and even glues 50+ years old.
