

Graffiti Remover Application Instructions

1. Spray on surface with low pressure sprayer from bottom to top (do not dilute product with water).
2. Agitate on surface with soft bristle brush and the graffiti will soften. The amount of time to soften will vary based on the graffiti content. Allow Graffiti Remover to remain on the surface for a minimum of five minutes.
3. Rinse with water, preferably high-pressure water.
4. On flat surfaces, Graffiti Remover will cover 200 to 400 ft² per gallon depending on the thickness of the graffiti. On porous surfaces or thicker graffiti, coverage will be 150 ft² per gallon.
5. Reapplication may be necessary on severe surfaces.
