Malt extract is a naturally derived carbohydrate-rich product obtained from malted barley and is used commercially across food, beverage, fermentation, and select industrial markets. Its value lies in its fermentable sugars, flavor profile, and functional properties.

Food and Beverage

- Brewing and distilling as a fermentable sugar source and flavor contributor in beer, malt beverages, and spirits
- Bakery applications to enhance flavor, color, crust development, and yeast activity in breads and baked goods
- Confectionery and snacks as a sweetener and flavoring agent in cereals, malted milk products, and energy bars
- Non-alcoholic beverages such as malt drinks and flavored nutritional beverages

Nutritional and Dietary Products

- Nutritional supplements and tonics due to natural carbohydrates, amino acids, and B-vitamins
- Sports and energy formulations as a natural carbohydrate source
- Infant and pediatric nutrition (grade- and regulation-dependent)

Fermentation and Biotechnology

- Microbial growth media for yeast and bacteria in laboratory, pharmaceutical, and industrial fermentation
- Starter cultures for food and beverage fermentation processes

Animal Feed

- Palatability enhancer in livestock and pet food
- Energy source in specialty and performance feed formulations

Pharmaceutical and Healthcare

- Excipient and flavoring agent in syrups and oral dosage forms
- Carrier for iron and vitamin formulations in liquid supplements

Other Industrial Uses

- Natural binder and humectant in specialty applications
- Flavor masking agent in functional formulations

The most active secondary markets are typically craft brewing, animal feed manufacturers, fermentation labs, and food processors, provided shelf life, moisture content, and microbiological specifications are acceptable.

Do not leave affected person unattended. Remove victim out of the danger area. Keep affected person warm, still and covered. Take off immediately all contaminated clothing. In all cases of doubt, or when symptoms persist, seek medical advice. In case of unconsciousness place person in the recovery position. Never give anything by mouth.

Following inhalation

If breathing is irregular or stopped, immediately seek medical assistance and start first aid actions. Provide fresh air.

Following skin contact

Brush off loose particles from skin. Rinse skin with water/shower.

Following eye contact

Remove contact lenses, if present and easy to do. Continue rinsing. Irrigate copiously with clean, fresh water for at least 10 minutes, holding the eyelids apart.

Following ingestion
