

Solvent Systems International's COVID-19 Response

Elk Grove Village, IL May 11, 2020 --- Solvent Systems International announces a COVID-19 Sanitizer product line to help businesses and municipalities provide a safe environment for customers, workers, and citizens. People will require a feeling of safety to return to businesses and cities and resume commerce. SSI's products will help create this safe environment in an economical and environmentally friendly way.

Proxitane is a peracetic acid (PAA) product. PAA is made by reacting hydrogen peroxide with acetic acid (Vinegar) producing a green disinfectant that is on the EPA's safer choice chemical list. Proxitane is safe for the environment, breaking down into water, oxygen, and carbon dioxide. SSI is selling two Proxitane formulations. Proxitane AHC is specially formulated with a detergent for excellent cleaning and contact with surfaces spanning plastic, stainless steel, linoleum, vinyl, glazed porcelain, and glass. Proxitane AHC is registered for use against COVID-19 (EPA Registration Number 68660-11). Proxitane EX has the same virus killing properties as AHC but does not include the surfactant making it a USDA approved organic disinfectant safe for food contact. Proxitane can be fogged or foamed.

Sterilex is an EPA registered disinfectant (EPA Reg. No. 63761-8) approved to kill organisms such as Listeria, Salmonella, E. coli, and COVID-19 on food contact equipment and surfaces. It has a broad-spectrum killing ability. Sterilex is easy to mix, foam and use as a soak or fog.

Alcohol Based Surface Cleaner is ideal for daily cleaning of light contaminants from hard surfaces such as tables, doorknobs, railings, PPE, and equipment. It is safe on plastic, steel, stainless steel, and aluminum. Ready-to-use and contains 70% alcohol.

Gel Alcohol Hand Cleaner cleans harmful microorganisms from hands including inactivating viruses like COVID-19. It provides quick cleaning with no rinsing and completely evaporates from the skin leaving no residue and eliminates the need for towels. It may be used repeatedly throughout the day without skin irritation.

ABOUT THE COMPANY Solvent Systems International is an Environmental Services Company supplying and manufacturing biobased cleaning chemicals and bio-solvents as well as providing regional chemical waste management services since 1983. The company has won multiple State pollution prevention awards as well as design innovation awards.
